

The A to Z about Hepatitis B

🔍 What is Hepatitis B?

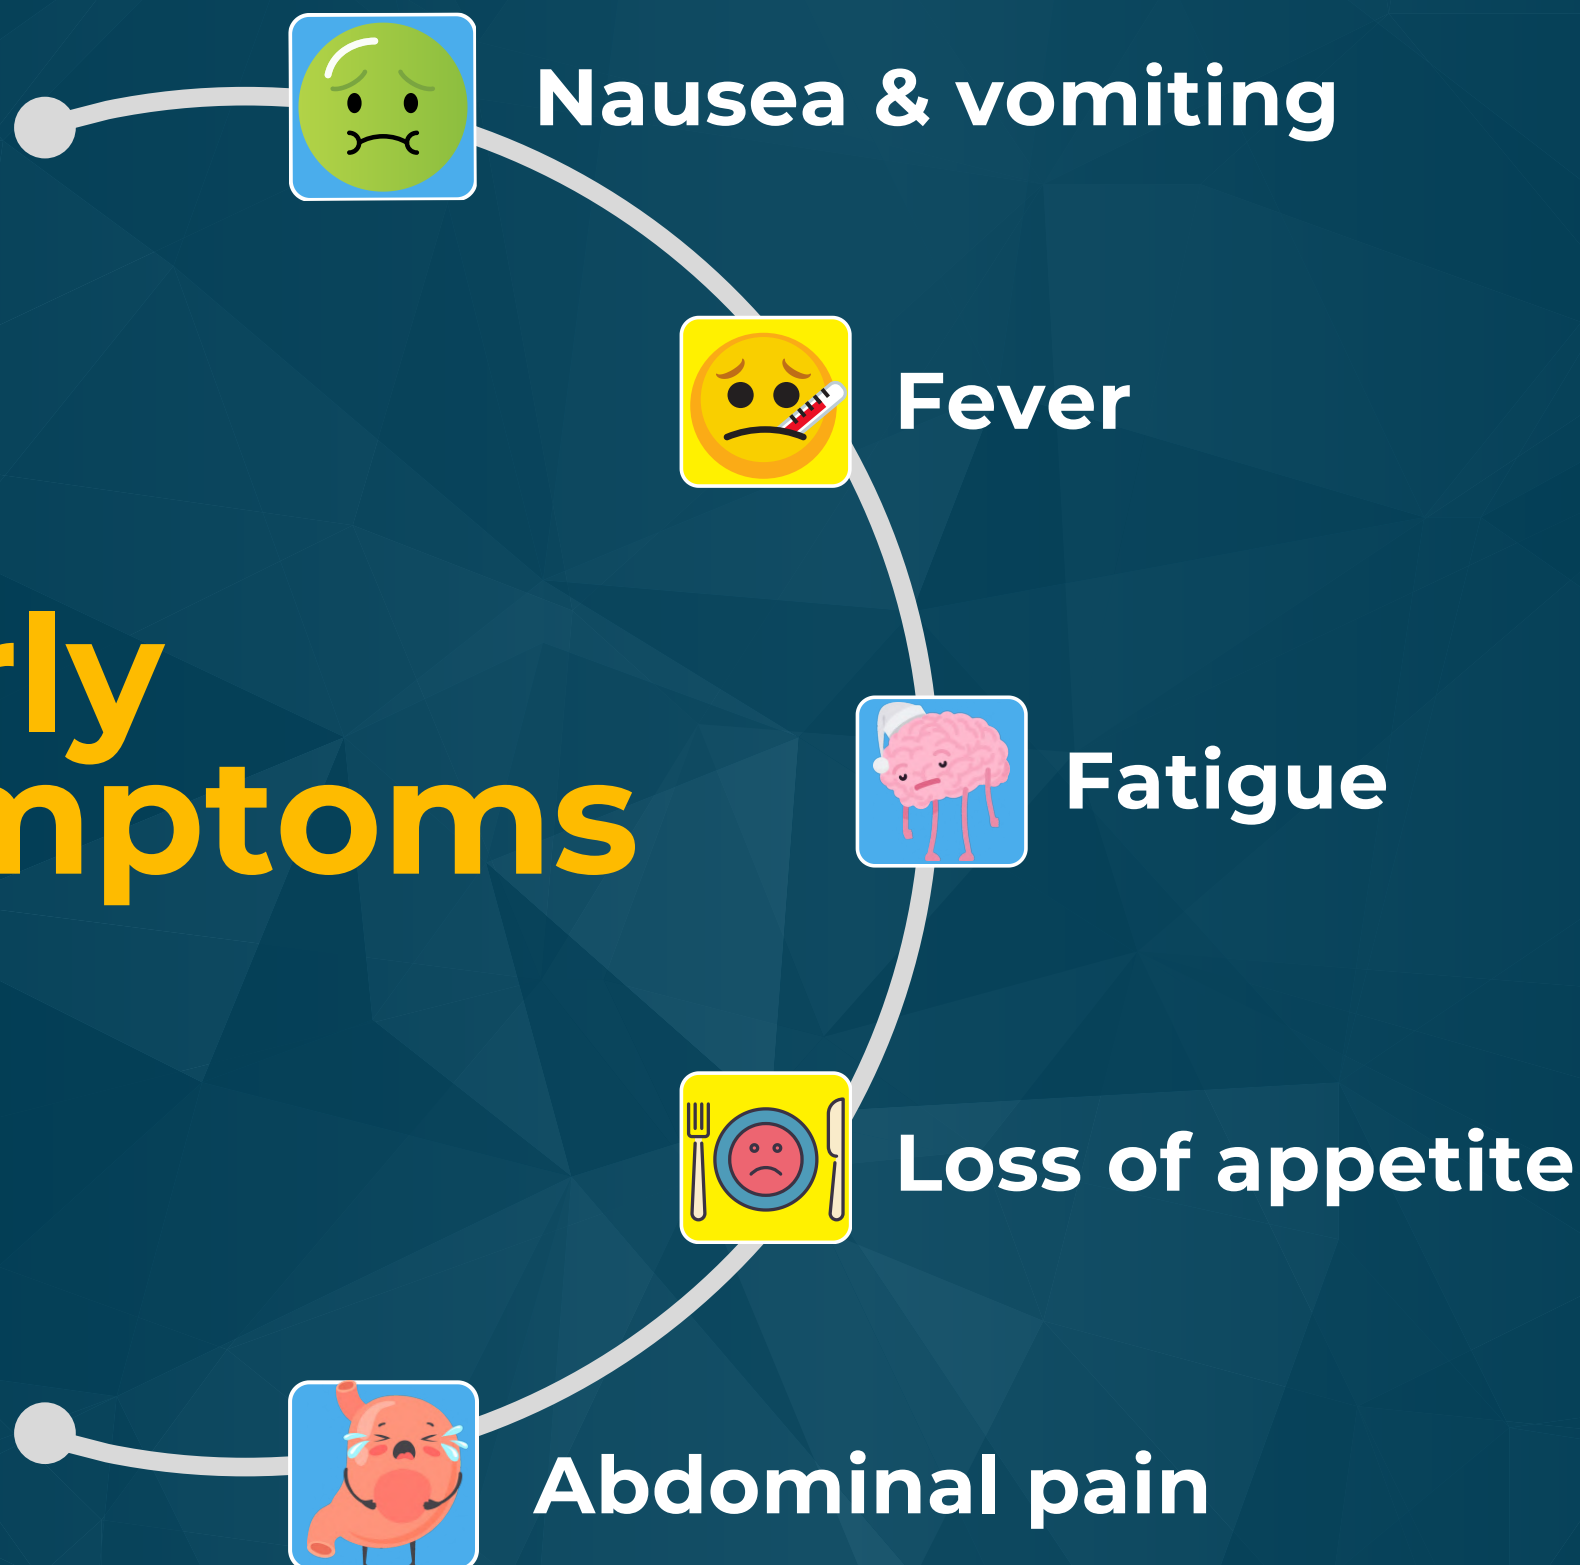

Hepatitis B is a viral infection that mainly targets the liver, causing inflammation and potentially leading to serious complications, like cirrhosis, liver failure and even liver cancer. It spreads through contact with infected blood and fluids.

Symptoms →

Early symptoms

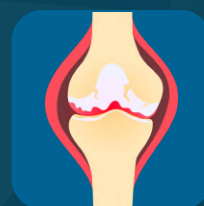

Later symptoms

**Dark
urine**

**Clay-
colored
stools**

**Joint
pain**

Jaundice

Prevention methods

Practice safe sex

Don't share personal hygiene items

(Razors, toothbrushes, needles etc)

Get vaccinated

(usually 3 doses across 6 months)
